

INTENSIVE PROGRAMME ADVANCED TOPICS IN BANK RISK MANAGEMENT (6 ECTS)

19 March - 1 April 2017
Alexandru Ioan Cuza University of Iași (Romania)

COURSE OUTLINE

CREDIT SCORECARD DEVELOPMENT

About the topic

Lending is a major function performed by financial institutions. It involves many different types of risk, among which the most important one is credit risk.

Though the essential elements of credit risk are still unchanged, financial institutions and investors are facing credit risk in many different, and often novel, forms. The rapid development makes it hard for even sophisticated investors, such as financial institutions, to properly understand, assess, and manage the credit risk involved in their transactions.

The latest global financial crisis has brought to the forefront the need for better credit risk measurement. The ability to distinguish between good and bad customers represents a key factor in conducting banking transactions.

The aim of this intensive programme is to introduce participants into the practice of credit risk management, with a particular emphasis on credit scoring and scorecard development.

Didactic concept

This Intensive Programme is a unique opportunity to take part in an international event, to deepen your knowledge, to work in contact with an important financial company and to experiment professional group work in a multinational team.

The course is organized in the form of a workshop including both lectures and tutorials offered by local teachers and distinguished guest experts. These will provide the required theoretical background in credit risk management and will be followed by an input into a business case supplied by the representative of the local industry partner - Banca Comercială Română S.A. The aim of the case study is to build and calibrate a scorecard for individuals.

Intercultural learning will be an integral part of the onsite local course experience. In addition to the diversity of the case group, consisting of students that will represent each of the four participating higher education institutions, a local expert will provide an input into topics such as cross cultural training, intercultural stimulation, cultural awareness training, and how to work in international teams.

Social programme

To provide an insight into the rich cultural environment of the city of Iași the academic programme will be complemented by a social programme offered free of charge.

VENUE

Alexandru Ioan Cuza University of Iași

Faculty of Economics and Business Administration
Lăpușneanu Street, 14, Room 402, Iași, Romania
